JET-VAC COMBI · EQUIPMENT SHEET

ROLBA MediumCombi

Wet suction and high-pressure jetting on one truck, for sewers, drains, culverts and liquid industrial waste. Stainless steel tank with tipping function and a hydraulically opening rear hatch.

Specifications

Vacuum capacity	22,000 l/min (lobe pump); up to 38,000 l/min with rotary vane or lobe pump
Tank	Up to 21 m³, stainless steel; water compartment and one or more sludge compartments
High-pressure pump	93 l/min at 200 bar; alternatives 102 l/min at 160 bar and 153 l/min at 130 bar
Jetting hose reel	120 m of ½ inch jetting hose
Suction hose reel	50 m of 3 inch suction hose; up to 70 m
Suction hose options	4 inch or 5 inch
Hose feed	Cassette hose feed driven by four motors
Discharge	Tipping tank, hydraulically opening rear hatch
ADR	ADR-approved, acid-resistant tank available
Transfer pump	1,500 l/min, for flooded areas and overpumping

- Drains and sewers: jetting and suction to clear blocked and silted lines
- Culverts, gullies and manholes
- Sludge and liquids from process and storage areas
- Planned and pre-season clean-outs
